Meera Mohanan

Objective

Self-motivated and detail-oriented Junior Web Developer with a strong foundation in Full Stack Web Development from the University of New Hampshire Coding Bootcamp. I am eager to contribute to innovative projects, collaborate with a professional team, and further develop my skills in web development. Looking to step into a full-stack junior developer position upon completion of the bootcamp.

Education

University of Western Austrlia Coding Bootcamp, Perth (Online)

> Full Stack Web Development Certificate – (In Progress) August, 2023

Intensive 24-week program with a focus on web development and programming skills.

Developed proficiency in front-end and back-end development, working with databases, and building user-focused web applications.

Rajagiri College of Social Sciences (RCSS)

> The Master of Business Administration- 2004-2006 (Completed)

Developed a strong foundation in accounting principles, financial analysis, and business management.

Completed coursework in financial accounting, managerial accounting, microeconomics, and macroeconomics.

Relevant Skills

Front-End Development:

HTML5, **CSS3**, and **JavaScript** for responsive web design and cross-browser compatibility

Bootstrap and Material-UI frameworks

React.js for building user interfaces (part of MERN stack)

Back-End Development:

Javascript, OOP, with some **jQuery** experience with **RESTful APIs** and third-party API integration

Node.js and **Express.js** for server-side development with **MVC** architecture

Experience with database management using **MongoDB, Mongoose,** and **MySQL**

Sequelize ORM for database integration and **Handlebars.JS** for server-side templating

MERN stack

Additional Libraries and Tools:

Day.JS for date and time formatting, and **PassportJS** for cookie/session authentication

Git and **Github** version control, **Heroku** Deployment

Experience

Assisted with the development of web applications using HTML, CSS, JavaScript, and React.js.

Collaborated with a team of developers to identify and resolve bugs and improve website performance.

Participated in code reviews and contributed to maintaining the codebase in version control systems.
